

5V Light Control Module

Description: - Using the photoresistor induction light intensity comes with the relay, direct control load - Distribution bit sensitivity adjustment, start relay threshold set ...

We carry a small variety of 5VDC LED Modules that can be controlled by DMX control. All of the 5 volt LED Modules that we carry are digital type and require a specialized Digital IC type control that must ...

Automatically control a load based on ambient light detection. The Light Sensitive Relay Module 5V can automatically control a load such as a night security light based on the ambient light level. Built-in ...

The 5V Light Sensor Photoresistor Relay Board Module (XH-M131) is perfect for automated light control applications, such as streetlights and security systems. It uses a photoresistor to detect ambient light ...

It integrates a photoresistor for light sensing and a relay for switching external loads based on ambient light levels. This module is suitable for various applications ...

Input: 5V DC. BLUE LED ON: Relay is working. Load capacity: 10A / AC 250V or DC up to 30V. - Module have four fixed bolt hole for easy installation.

This XH-M131 module can be used for light detection, brightness detection, with power indicator (red) and relay suction indicator (blue), and with four M3 screw mounting holes, which greatly facilitates ...

It is with a 5V~12V TIL control signal which can control DC / AC signal. The module is perfect for common Arduino applications. Useful to control a motor, a led strip, or any other module using Arduino.

Description: - Using the photoresistor induction light intensity comes with the relay, direct control load - Distribution bit sensitivity adjustment, start relay threshold set by adjusting potentio...

It integrates a photoresistor for light sensing and a relay for switching external loads based on ambient light levels. This module is suitable for various applications such as night lights, street lights, and ...

Tatazone 5V USB COB Led Strip Light with RF Remote, 4.92ft 6500K CRI93+ USB Powered COB Led Light Strip, Dimmable Indoor COB Led Light for Cabinet, TV, Camping, Monitor, Showcase, Motorhome

Has anyone here used the common SRD-05VDC-SL-C relay modules in lighting or outlet control projects? I know they're rated for 10A, but in practice I'm not sure how reliable they are for ...

5V Light Control Module
