

This growth is primarily fueled by three core drivers: explosive growth in AI computing power demand, global data center upgrades, and cloud service expansion, as well as technological ...

Optical modules convert electrical signals into light to move data quickly and reliably in AI systems, enabling fast and smooth data processing. Using advanced optical modules boosts AI ...

In addition to providing high-speed (800G, 1.6T and above) optical engines and optical modules for AI clusters and hyperscale data centers, POET has designed and produced novel light ...

GlobalFoundries (GFS) unveils its SCALE(TM) optical module, setting a new benchmark for co-packaged optics and bandwidth density in advanced AI data centers. The new platform meets ...

Learn about optical solutions that are open, scalable and power-efficient for AI infrastructure.

According to the company, the Silicon photonics Co-packaged Advanced Light Engine (SCALE) solution is the industry's first Optical Compute Interconnect Multi-Source Agreement (OCI ...

MALTA, N.Y., May 4, 2026 - GlobalFoundries (Nasdaq: GFS) (GF) today announced the introduction of its SCALE(TM) optical module solution for co-packaged optics (CPO). GF's SCALE ...

XPO modules are designed to complement existing modules and other interconnect technologies rather than compete directly against them. Adoption of XPO will drive advances in ...

Explore the evolving AI Optical Chips market as we profile ten industry top players shaping innovation, efficiency, and competitive dynamics. Readers will discover the unique positions and strengths of ...

This paper outlines the new requirements imposed by this AI-driven transformation and introduces a purpose-built optical architecture designed to meet these challenges.

AI optical module products
