

Delta Micro Module Design

With the fully modularized design concept, Delta's containerized datacenter is flexible and scalable with only a few weeks or months for deployment to meet the rapidly growing IT needs.

DELTA's Micro Data Center Configurator: a simplified innovative solution for designing Micro Data Centers. Accessible via Google Chrome, this tool streamlines the planning of low-voltage power ...

With a "new force in the micro module world" that meets high reliability, energy saving, and high efficiency, enterprise-level users can easily set up data centers in office buildings and accelerate the ...

Delta's modular datacenter solution offers a datacenter environment that provides safe equipment operations within the racks, and supports the development and standardizing of micro datacenters ...

Our modular design supports customization to meet your specific data center capacity and performance goals. Each prefab data center unit comes fully equipped with power distribution, cooling systems, ...

Smart, modular design for optimizing space utilization. Have the entire data center at your fingertips. Delta Infrasuite is a tier 3 data center design solution for planning and building high performance data ...

Their compact, rack-level design makes them ideal for remote locations, industrial sites, and space-constrained environments--especially where edge computing and processing data closer to end ...

Delta micro-datacentre is designed and engineered with expansion in mind. It allows IT professionals to smoothly, plan, grow and manage critical assets as they expand their infrastructure.
