

Endurance rack without internal cable routing

Hi all, I would like to find a new handlebar which has channels recessed underneath for the gear cables and brake hoses, so they emerge close to the stem. Ideally, I would like the bar to be ...

TD3 and Flaanimal 4 and 5 frames have had Non Integrated Internal Routing for years. It may not be stealthy and sexy ...

What are the best options for a frame without full internal headset routing? Looks like all the latest models follow this headset integration trend. I like the aero aesthetic, but I'm used to partly ...

With this style of stem you can pull brake line through the fork without drilling it if there are no restrictions inside.

My bike doesn't have internal routing and I'm debating whether or not it's worth struggling to get the cables through and whether it will affect brake and shifting performance (both mechanical).

Components with external cable routing, especially the handlebar and stem, are easier to adjust or replace. So, if you don't ...

Components with external cable routing, especially the handlebar and stem, are easier to adjust or replace. So, if you don't know what dimensions or bike fit will suit you best, you won't have ...

It has endurance geometry, and the lower-spec frames (not the "01") have ports on the downtube for both a brake hose and mechanical shifting. Up until 2024, those bikes also came with ...

Internal cable routing gives your bike a sleek, modern look by hiding cables inside the frame, but it can be harder to maintain and repair. External routing is simpler to adjust and fix quickly, ...
