

Fiber Optic Media Switch

We have a large selection of fiber optic components for your network applications. 10/100Base-TX to 100Base-FX and 1000Base-TX switches are available in many different port variations.

A fiber media converter takes an Ethernet signal on copper (RJ-45) and converts it to an optical signal on fiber, or vice versa. There are also fiber-to-fiber versions that translate between ...

We offer solutions that provide seamless transmission and conversion from Ethernet media to multimode or singlemode fiber. Our Ethernet network switches with fiber ports comes in managed or ...

Learn how to connect fiber media converters step by step, check key setup details, and choose the right model to ensure stable fiber-to-copper integration.

Signamax's fiber Ethernet switches accommodate growing networks that require fiber connectivity. With 8 or 24 SFP ports these switches can be configured with multiple media types (UTP, Multimode and ...

Discover fiber switches designed for reliable network connectivity. Browse 10G, 2.5G, and gigabit options to expand your bandwidth.

Fiber media converters allow you to connect two different types of network infrastructure: fiber-optic and copper (Ethernet). These devices are essential when you need to bridge fiber optic ...

The TC3240 4-port Switching/Bridging Fiber Optic Ethernet Media Converter converts or connects UTP (10/100Base-TX) networks to Fiber Optic (100Base-FX) networks.

10GBase media converter supports a 10GbE fiber connection with CAT.6a, CAT7 RJ45 Copper. This converter designed with 2 SFP+ slots, SFP1 port for a SFP+ -T module, SFP2 port for a SFP+ fiber ...

How does this device work as a fiber media converter? It converts electrical Ethernet signals from RJ45 cables to optical signals via SFP modules and vice versa, allowing long-distance transmission over ...
