

# Global demand for optical modules declines

oAEC/direct attach copper cables (DACs), AOCs, and optical transceiver capacity: While there is already a high demand for AECs/DACs, AOCs, and optical transceivers to support new AI deployments, it ...

The optics module market is booming, projected to reach \$42 billion by 2033, driven by 5G, cloud computing, and data center expansion. Learn about key market trends, leading ...

Access detailed insights on the Optical Modules Market, forecasted to rise from USD 3.5 billion in 2024 to USD 8.2 billion by 2033, at a CAGR of 10.3%. The report examines critical market trends, key ...

Within Communications growth is driven by strong Datacom demand for high-speed optical transceivers--particularly 800G and 400G modules--as hyperscalers race to upgrade their networks ...

This report aims to provide a comprehensive presentation of the global market for Optical Modules, focusing on the total sales volume, sales revenue, price, key companies market share and ...

Overview of the optical communication module market demand and supply chain, and production capacity in various regions in 2025

TrendForce's latest research indicates that the global market for AI-focused optical transceivers has entered a phase of rapid growth, with market size projected to expand from ...

Supply chain disruptions in 2022 caused a 15% delay in delivering high-speed optical modules to data center clients, primarily due to semiconductor shortages. Global R& D spending in ...

Its numbers contain no fluff; this quarter's revenue and EPS both set company records, with management explicitly stating on the call that data center optical module demand continues to ...

Over the next five years, the global optical module market will maintain a 16% CAGR, with a projected 6% YoY decline in 2023. Amazon, Google, Microsoft, and other cloud companies ...
