

# Grenada 505nm Laser Diode Module

Wide range wavelengths of 505nm, 515nm, 520nm, and 532nm green laser diode modules assure high brightness green laser light emission and highly clear green dot measurement for high tech and lab ...

Recent advancements in GaN technology have allowed for the development of green laser diodes, which have filled in the lower wavelength range with diodes available between 505 nm and 520 nm.

The diode laser modules that output red, green and blue laser beam, as well as full-colour white-light laser beam (RGB laser diode modules), are used mainly in laser display projectors.

Pigtailed Laser Diode Modules are available with VIS and NIR wavelengths ranging from 405 to 1550nm, with output powers ranging from 1 to 100mW. Their plug and play operation make these laser diodes ...

505 nm laser diode module (50 mW) with 105 &#181;m multimode fiber, tailored for OEM systems -- includes seamless integration with laser diode and driver solutions.

This plug-and-play laser source utilizes Coherent's Optically Pumped Semiconductor Laser (OPSL) technology to deliver industry-best laser reliability and performance.

Find single mode laser diodes in 9mm free space TO package with output power 5-150mW in the wavelength range 735-1600nm in QPhotonics online store.

Laser diode modules are compact devices that integrate a laser diode, optical components, and a driver circuit to produce coherent, high-intensity light for various applications, including industrial, medical, ...

505nm 10mW Single-mode Pigtailed Laser Green Diode Laser Module. It can be customized for multi-mode fiber coupling laser, and the output power will be higher.

The LWPRO-505-1 is a professional low-power semiconductor green laser module that provides stable continuous light output of 1mW at an emission wavelength of 505nm. The product includes a high ...
