Iran OTN Router 200G

FS transponder/muxponder aggregates 40G/100G into 100G/200G coherent DWDM uplink for up to 200G capacity transport over single wavelength, no need of dispersion compensation.

The HTN6800-M2H20 is a 200G OTN Transponder/Muxponder board capable of packaging and de-packaging functions from 100G/40G/10G services to OTUC2. The client-side port allows access to 2 ...

The 200G OTN Muxponder (MXP200GOTN) provides mapping and multiplexing for multi-service 10G to 100G client services to either 100G or 200G coherent line signals for the XTM Series of packet ...

The 200G OTN Muxponder supports standardized mapping, multiplexing and transportation of services over one or two OTU4 line signals according to ITU-T G.709 standards.

The 200G OTN Muxponder supports standardized mapping, multiplexing and transportation of services over one or two OTU4 line signals ...

Product Description Telecom carriers operating legacy core routers and dense OTN transponders require optical modules that match their heavy-duty chassis specifications. The Custom 200GBASE ...

A single port can stably transmit 200G-rate services. It is mainly used in the core layer and convergence layer network of national optical network backbone lines, operator MAN, data center interconnection ...

M2H20OTNis a high density 1U height 200G OTN muxponder, it adopts the advanced technology and ASIC chip, and it is fully compliant with domestic and international related standards (such as ITU-T ...

The WDM/OTN solution is reliable and easy to maintain. It provides flexible transmission and fast service provisioning, allowing carriers to offer a wide range of diverse and appealing services.

They are ideal solutions for Data Center Interconnection, OTN-based business leased lines and other fiber-based access application scenarios.

To achieve massive information interaction and meet the demand for ultra-high speed and ultra-bandwidth data center interconnection (DCI), QSFPTEK has launched the 200G transponder - a ...
