

JXF Metal Distribution Box is designed to be assembled into the distribution box with various control functions according to the type of components, specification and quantity.

The JP outdoor integrated distribution box is a multifunctional outdoor power distribution device that combines metering, outgoing lines, reactive power compensation, and other functions. It integrates ...

JXF small distribution box is a widely used device in low-voltage power systems, designed for the distribution and control of electrical energy. Suitable for various buildings, industrial, and commercial ...

We will present the performance, safe operation methods, and technical parameters of JXF low-voltage distribution box

JXF series products are suitable for power, lighting and loop power distribution control, monitoring and metering protection in 50Hz~60Hz, single-phase two-wire, three-phase three-wire, three-phase four ...

JXF Series Power Distribution Box product is box assembled with various control functions by customer-selected components, and there are many box sizes and specifications and the size of ...

Open-mounted distribution box installation method: Assemble four bolts into the four holes on the corners and tighten them into the expansion pipes to fix the box.

JXF Distribution box is suitable for three-phase three wire, three-phase four wire, and three-phase five wire systems with 50Hz, 500V and below, and load current not exceeding 250A provides ...

(JXF indoor/JFF outdoor) enclosure box is designed to be assembled into the distributing box with various control functions according to the type of components, specifications and quantity.

The JXF power distribution box is suitable for AC 50 (60HZ) power supply systems with voltages up to 400V, used for branch circuit distribution, and also for small-capacity power distribution.
