

# Laser Diode 532nm

These 532nm DPSS laser modules offer an optical output power up to 1500mW while operating in a CW mode. They deliver exceptional power stability and an M squared factor of less than 1.2.

Our high quality Green Laser Diodes are ideal for commercial, industrial, and OEM applications requiring longer duty cycles, frequent intermittent use, and application specific tolerances. Our green laser ...

GREEN diode pumped solid state (DPSS) laser pointer emitting at 532 nm with rated output power of <5 mW, utilizing a 808 nm pump laser diode with Nd:YVO4 crystal and IR filter. An integrated Automatic ...

Thorlabs" compact 532 nm Diode-Pumped Solid State (DPSS) green laser modules are a combination of Nd:YVO 4 and KTP crystals pumped by an 808 nm laser diode. The front window consists of a ...

This package design features the smallest footprint and high output power. This results in a high packing density which allows for an extremely compact system design. The highly thermal-conductive base ...

SHOP 532nm Laser Diodes, SELECTION GUIDE, All the Manufacturers of 532nm Green Laser Diodes on One Site, Get the Best Prices

Shop 532nm green laser modules for positioning, alignment, and DIY applications. Find reliable diodes with multiple beam patterns available.

JUNO Compact series offers a Nd:YVO4 based diode pumped solid state product generating single-mode ultra-low noise green laser with 5-6W power and 532nm wavelength through the non-linear ...

Our q-switched 532nm Nd:YAG lasers, generated as the second harmonic of 1064nm, provide high-energy green output for precision applications in Industrial, Medical, and Research fields.

The 532 nm laser is one of the oldest and most established of diode pumped solid state lasers (DPSSLs). It revolutionized the laser community and the idea of an all solid state (as opposed to gas ...
