

Our Nordic Market Expert, Priyanka Shinde assesses market volatility, price correlation and increasing instances of negative pricing in the ...

Data was collected in the form of a literature review and interviews to provide a holistic representation of off-grid and its nexus to the electricity system. In addition to this, complementing modelling of grid ...

Figure 3: Box plots of discount rates in the 59 articles on 100% renewable off-grid energy systems, classified by country in which the case study was investigated. 41 articles on 100% renewable off-grid ...

In 2024, Sweden saw significant import shipments of off-grid solar energy products from various countries including Slovakia, Germany, China, Denmark, and the USA. The market remained ...

This places a renewed premium on system-wide energy planning and may prompt a need to rebalance electricity price variations across regions. An inquiry into Sweden's electricity market development ...

We publish many different datasets of historical data collected: hourly, monthly and yearly. Data is aggregated by country.

Off-grid power refers to energy systems that operate independently of the central electrical grid, often in remote or underserved areas. This autonomy provides energy independence and ...

This review gives a global overview of the levelized cost of electricity (LCOE) for these autonomous energy systems, which range from 0.03 \$₂₀₂₁ /kWh to over 1.00 \$₂₀₂₁/kWh worldwide.

This report tracks emission reductions and key drivers for achieving a carbon-neutral Nordic energy system, assessing progress across Denmark, Finland, Iceland, Norway, and Sweden.

Real time map that shows the power exchange and prices between the different price areas in Denmark, Sweden, Finland, Norway, Estonia, Latvia and Lithuania.

In addition, to have a more realistic assessment of renewable energy potential, this thesis introduces a new metric "Renewable levelized cost of electricity available for export", which incorporates ...

At the end of 2024, 293,019 grid-connected PV systems were in operation in Sweden. The average PV system size was approximately 16.4 kW, illustrating that the market continues to be dominated by ...

Low-noise off-grid power systems exported from Sweden
