

Managed ring network industrial-grade switches

It incorporates advanced ITU-T G.8032 ERPS (Ethernet Ring Protection Switching) technology, Spanning Tree Protocol (802.1s MSTP), and redundant power input system into customer's industrial ...

The Ethernet Ring Protection Switching (ERPS) protocol is a powerful technology and service that can be used on industrial switches to ensure high network availability and prevent network downtime.

ORing offers a comprehensive portfolio of rugged industrial Ethernet switches, from cost-effective unmanaged and PoE models to advanced Layer 2/3 managed switches enabling precise control. Our ...

Extreme Industrial Switches are an excellent choice for industrial environments, including intelligent transportation systems, utilities, and smart cities. Full redundant ring technology creates fault- ...

Moxa provides a wide range of industrial Ethernet switches that feature industrial-grade reliability, network redundancy, strengthened security, easy management, and competitive price-to ...

Our managed Ethernet switches, fiber switches, and router switches provide fast Ethernet and gigabit combo ports as well as numerous network protocols, such as SNMP, PROFINET, and Ethernet/IP, ...

Strengthen your network with Westermo managed layer 2 industrial Ethernet switches. Support for redundant rings, cybersecurity & PoE. Browse the range.

Managed with Cisco Catalyst Center or Cisco Meraki. Built for secure industrial automation and a wide range of use cases, these modular switches with PoE options support advanced resiliency protocols ...

Specifically designed to connect devices in network environments that are subject to extreme operating temperatures of -40°C to 75°C, vibrations, and shocks, Perle has over 516 models of Managed ...

ATOP's range of ruggedized Managed Switches are engineered for reliable performance in harsh industrial environments, while enabling additional security, configuration, and add-value features ...
