hi friends. today i opened my sunroof (as i do on a regular basis), and it would not close. attempting to use the automatic button on the roof above the center panel did not work. performing a reset did ...

After an hour or so, the windows and sunroof opened automatically and now whenever I turn my car off it automatically opens up. It's very frustrating as I can't take the car anywhere as parking it outside with ...

A suggested solution is to perform a sunroof reset and recalibration, which typically requires specialized diagnostic tools. The problem was resolved at a workshop through a sunroof reset and calibration, ...

After loads of messing about, I've found that the rear left sunroof scissor link isn't moving forwards or back as it should. The front wasn't shutting at all, then I noticed the rear was lopsided in tilt.

I have a 2015 Cooper S with the panoramic sunroof. I took it in for service recently and after I took the car home I noticed the sunroof no longer had the one touch functionality, or the ability to ...

If your automatic sunroof is not functioning properly, you may need to reset it. This process can help resolve issues like the sunroof not opening or closing fully, or the controls not responding as expected.

Just wanted to add a data point -- The sunroof reset procedure wouldn't work for me (2012 wagon) unless the engine was ON. Otherwise the car would give a low battery warning and/or ...
