

Niger fiber optic cable laying

Niger has completed a major 640-mile fiber optic cable network, a \$50 million project funded by the African Development Bank, designed to boost broadband access across the country.

In particular, the project will improve Niger's digital resilience, accelerate the digitization of public services and create new economic opportunities for young people, thanks to high-quality broadband ...

The project has two major components: first, the construction of a 1,031-km national and cross-border fibre-optic network; and secondly, the ...

The project has two major components: first, the construction of a 1,031-km national and cross-border fibre-optic network; and secondly, the installation of a Tier III national data centre.

The AfDB-backed fibre-optic cable project estimated at \$50 million (EUR43 million) covers five key routes in the expansive West African country.

Niger has completed all sections of its component of the Trans-Saharan Fiber Optic Backbone. A provisional handover ceremony was held on Friday, November 14, 2025, marking a key ...

In November 2025, Niger officially completed provisional acceptance of the fibre-optic sections built under the Trans-Sahara Optical Fibre Backbone Project (TSB) - a project financed by ...

Niger has completed the various sections comprising its part of the Trans-Saharan Fiber Optic Backbone. A provisional acceptance ceremony was held on Friday, November 14, 2025, to ...

The cable, a step toward improving the West African country's broadband connectivity, will run along its borders with Algeria, Benin, Burkina Faso, Chad, and Nigeria.

This Regulation applies to all Licensee Operators seeking to install, place, lay, or maintain network facilities on, under, or across public land within Niger State.
