

Optical modules and fiber optic transmission cards

Optical modules typically have an electrical interface on the side that connects to the inside of the system and an optical interface on the side that connects to the outside world through a fiber optic ...

Our Optical Transceivers & Modules category includes a comprehensive range of hot-swappable, high-performance modules for fiber optic communication. From SFP/SFP+, QSFP+/QSFP28, to custom ...

Pricing (USD) Filter the results in the table by unit price based on your quantity. A tariff of 8 % may be applied if shipping to the United States. A tariff of 6 % may be applied if shipping to the United States.

Shop DigiKey's large in-stock selection of Fiber Optic Transceiver Modules. View inventory, pricing and order now for same day shipping!

A fiber optic transceiver (also called an optical transceiver) is a compact module that both transmits and receives data signals through optical fibers. It serves a dual purpose -- transmitting ...

Optical Transceivers cards and operate at data rates in excess of 100 Gbps. They are capable of distances ranging from very short reach within a data center to campus, access, metro, and long-haul ...

Optical modules (also known as fiber optic transceivers) are essential components in modern communication networks, enabling high-speed data transmission by converting electrical ...

Explore the ultimate guide to optical modules. Learn types, functions, performance metrics & how to choose the right module for your fiber network.

All of our products are produced with Molex's high-quality standards, delivering superior optical, electrical and EMI performance for network robustness. Furthermore, Molex is a one-stop-shop for ...

FS offers a growing portfolio of optical transceivers, with speed range from 100M, 1G, 10G, 25G, 40G, 50G, 100G, 200G, 400G to 800G and beyond. The fiber optic transceiver modules can work in any ...
