

Professional clamps for high-voltage tubular busbars

Series "R" flexible braid connectors consist of one or more tinned copper round braids with specially formed tinned copper ferrules swaged onto the ends of the braids under high pressure to form solid ...

Our core insulating material is meticulously chosen to maintain stable insulation performance under high voltage and temperature, providing comprehensive protection from the inside out.

Product Description: eVent's full range of high-quality, reliable, certified products are easy to use - they save time, space, and maximize power density.

The crucial advantage for customers is that Lörnsner can offer complete solutions in equipment for high-voltage systems and provide the entire chain, consisting of insulators, tension strings, connection ...

These high-quality clamps are designed to securely hold busbars in place, preventing movement, reducing the risk of electrical faults, and enhancing overall system integrity.

These board-to-busbar connectors are designed to meet OCP V3 power distribution architecture standards and are ideal for use in power shelves, BBUs, server/storage sleds, EV ...

Our SIMABUS High Voltage Rigid Bus Connectors and clamps are designed for rigid bus connections in AC & DC applications for both Metric and Imperial sizes.

Molex provides a versatile range of high-current high-voltage busbar solutions suitable for various applications and environments. Busbars and busbar connectors are the backbone of many ...

Busbar Clamp to connect nVent ERIFLEX Flexibar to copper punched busbar without drilling.

Kaerda utilizes specialized formulations of BMC and SMC, designed to deliver exceptional mechanical strength to securely hold busbars, especially under electromechanical stress from short-circuit ...
