

QI-xm distribution box

It specializes in the production of transmission and distribution products such as complete sets of high and low voltage switchgear, capacitor compensation cabinets, various power control distribution ...

This series of products are widely used and can be assembled into control systems with different electrical properties as required such as air conditioning control box, machine tool transmission ...

The XM series distribution box is a versatile, reliable, and safety-focused solution for modern power distribution needs. Its robust design, modularity, and compliance with international standards make it ...

With a simple structure, clear labeling, and easy access, the distribution box ensures safe operation, quick maintenance, and reliable protection for low-voltage electrical systems.

XM Distribution box XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway ...

XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, ...

XM type low-voltage distribution box is suitable for industrial and mining enterprises, residential communities and high-rise buildings. It is used for power distribution, lighting and metering in low ...

This series of distribution boxes is mainly used in civil buildings, industrial and mining enterprises, high-rise buildings, residences and other places. The cabinet is made of high-quality cold-rolled steel ...

Detailed description: The distribution board is designed for use in office and administrative buildings, commercial facilities, and residential premises on general AC 50 Hz distribution networks with a ...

Suitable for circuits with AC 50 Hz and rated voltage 220/380 V, it is used for controlling and distributing power to electrical equipment, and provides overload, overvoltage, short-circuit and earth leakage ...

They can be assembled into a complete set of distribution boxes as line overload and short circuit protection, and can be used for temporary power distribution.
