

S10 Fiber Optic Sensor

Our fibre-optic cable systems partly cover the same applications as conventional optical sensors. Depending on the customer's application, they are available as photoelectric sensors or diffuse sensors.

High-performance digital fiber amplifier with smart tuning and power saving functions to keep the amplifier running more accurately and efficiently. Square-shape fiber sensor heads with sensing ...

E3C-S10 Fiber Optic Sensor Model: E3C-S10 MPN: E3C-S10 Description PHOTO BEAM BREAK 10CM

Fiber-optic sensors are ideal for detecting small parts. They use plastic or glass fiber-optic cables, which can also be used in hard-to-reach places due to their high flexibility. Plastic or glass fiber-optic cables ...

Digital Fiber Optic Sensors FS-N series Digital Fiber Optic Sensor FS-V30 series What is a Fiber Optic Sensor? A fiber optic sensor is an instrument that measures light from an LED (or other device) for ...

When installation space is extremely limited or the objects to be detected are tiny, fiber-optic sensors are the ideal solution. If it is necessary for even higher requirements to be fulfilled, such as sensing ...

The Broadcom AFBR-S10TR001Z is a 650nm analog fiber optic transceiver device designed to provide system designers with the ability to implement an optical arc flash sensor over 1mm Plastic Optical ...

Standard cylindrical fiber sensor heads The standard cylindrical fiber optic sensor heads provide reliable object detection, easy installation and long sensor lifetime for all general applications.

These Fiber Units offer better detection of small objects at close distances (of 2 mm or less) than Standard Reflective Fiber Units. They also detect glossy surfaces more reliably than Standard ...
