

# S7700 Aggregation Switch

**Product Application** The S7700 can be used as an aggregation switch on a large-scale campus network, helping to build a highly reliable, scalable, and manageable enterprise network.

Aggregation switches set up stacks to implement device-level backup and increase the interface density and forwarding bandwidth. A standalone AC is deployed in off-path mode. It centrally manages APs ...

The S7700 can function either as an aggregation or core node on a campus network or in a data center to provide integrated wireless access. The S7700 also offers voice, video, and data services, helping ...

The S7700 series switches are high-end smart routing switches designed for next-generation enterprise networks. The S7700 series can function either as an aggregation or core node on a campus ...

The S7700 series design is based on Huawei's intelligent multi-layer switching technology to provide intelligent service optimization methods, such as MPLS VPN, traffic analysis, comprehensive HQoS ...

The S7700 provides high-density 10GE ports and 100G ports, Each S7712 chassis can provide a maximum of 480 x 10GE ports or 24 x 100GE ports, meeting the requirements of bandwidth ...

The S7700 can be used as an aggregation switch on a large-Sized campus network, helping to build a highly reliable, scalable, and manageable enterprise network.

The S7700 switches can function as aggregation or core switches in a campus network to provide wireless access, voice, video, and data services, helping enterprises build an integrated end-to-end ...

They provide 100 GE ports, support SVF 2.0, and have superb scalability and reliability. Uses a fully programmable architecture, enabling new services to be flexibly and quickly provisioned within six ...
