

US Inquiry for 200G Aggregation Switch

Experience the power of link aggregation with versatile managed switches. Explore options with web-based management, VLAN support, and energy-efficient designs.

As enterprises and service providers face growing AI workloads and the need for faster, lossless data transport, many are upgrading from 100G or 200G to 400G architectures.

FS, Inc., provider of ICT products and solutions, highlights the N8550-24CD8D, a future-ready 200G switch widely adopted in AI storage and evolving data center deployments.

Powered by the Broadcom Trident 4 chip and large buffers, the switch ensures low-latency, high-throughput performance for demanding AI workloads. Its flexible port configuration also ...

Purpose-built for hybrid infrastructure upgrades and AI workloads, the switch delivers high throughput, flexible port design, and seamless scalability to support next-generation networking demands.

Use this tool to help you identify the switch you need.

Explore the FS N8510-24CD8D, a future-ready 200G data center switch built for high-density, scalable, and lossless networking. This guide covers specifications, module and cable compatibility, ...

Explore the FS N8510-24CD8D, a future-ready 200G data center switch built for high-density, scalable, and lossless networking. This guide covers specifications, ...

The NS-S6500 family from Network-Switch delivers exactly that same-class Leaf Switch and Spine Switch building blocks with 25G access and 100G uplinks, plus new QSFP56 200G and ...

Direct OEM/ODM manufacturer of 100G/200G transceivers for AI clusters & hyperscale cloud. 100% tested 100G QSFP28, 200G QSFP56, QSFP-DD & CFP2 solutions.

H3C S9825 series switches are a new generation of high-performance, high-density 400GE/200GE Ethernet switches launched by H3C for data centers. Provides high-density 400GE/200GE ports; ...
